CirrhoCare AI — Clinical Laboratory Report

Liver Function & Related Biomarkers • DRAFT — transcribed from user-provided screenshot

Patient Name	Rahul Rana Singh	**Patient ID**	CC-2026-1282
Report Date	29 October 2026	**Source**	Values entered in screenshot
Age / Gender	Not provided	**Lab verification**	Not verified

Laboratory Results

Test / Biomarker	Result	Unit	Preliminary observation*
Total Bilirubin	4.5	mg/dL	Elevated vs common adult ranges
Direct Bilirubin	5.1	mg/dL	Data consistency concern: exceeds total bilirubin
SGOT (AST)	70	U/L	Elevated vs common adult ranges
SGPT (ALT)	80	U/L	Elevated vs common adult ranges
Albumin	5.4	g/dL	Above some common reference ranges
Platelets	200	×10³/µL	Within many common adult ranges
Prothrombin Time	19.2	sec	Prolonged vs many common ranges
Alkaline Phosphatase	200	U/L	Elevated vs common adult ranges

*Observations are informational only. Reference intervals vary by laboratory, method, age, and clinical context; use the originating laboratory's ranges for formal interpretation.

Important Data-Quality Alert

Direct Bilirubin (5.1 mg/dL) is higher than Total Bilirubin (4.5 mg/dL), which is an internal consistency concern and may reflect a transcription or entry error. Verify both values against the original laboratory result before saving, sharing, or making clinical decisions.

Clinical Note

This is a draft generated from values visible in a screenshot. It is not an official laboratory-issued report, contains no verified specimen details or laboratory authorization, and is not a diagnosis. A qualified clinician should review the original report and interpret results in clinical context.

Document status: DRAFT • Not laboratory verified • No clinician/laboratory signature applied
